Profile

I am a Computer Information Systems graduate with a combination of technical and managerial skills, with a deep understanding of how information technology connects with business needs. I possess the ability to analyze systems, design databases, and solve technical problems effectively. I seek to leverage my knowledge to develop digital solutions that contribute to improving organizational performance and achieving their goals.

Education

Bachelor Degree of Computer Information Systems GPA 84.7% (Excellent)

Yarmouk University - 2024

Project

Solar Energy Service

- Designed and developed the backend logic and database schema for managing solar energy services using Code First approach with Entity Framework, creating and managing the database in SQL Server
- Implemented frontend components using ReactJS to enable users to register solar panels, schedule appointments, and view installation dates.

Courses

1. Web Application Development with .**NET Core MVC**
2. **API Design and Development**
3. **Frontend** Development with React
4. Programming with **Python**
5. Database Administration with **SQL**
6. **Oracle Databases**
7. Development with **Low-Code** Platforms like Mendix
8. Learn **C# and JavaScript**
9. Page Design with **HTML and CSS**

Skills

- Algorithms & Problem Solving
- Data Structures Clean Code
- Databases
- Sql Server Postgres
- Design Pattern & Principle
- MVC SOLD Principle OOP
- Backend Frameworks
- .NET .NET Core
- Entity Framework Core
- Entity Framework
- Frontend Frameworks & library
- Angular Reactjs
- Source Controls
- GitHub
- Mendix

Languages

- Arabic
- English
